

In addition, it is felt that there is some potential redundancy in claim 6 as worded, i.e., the bedknife is aligned on the horizontal surfaces as recited in claim 4. What applicant intended to recite in claim 6 is the additional alignment step by having an edge placed against vertical locator surfaces prior to energizing the electromagnets. Thus, additional language is proposed making this clear.

Entry of the Amendment is respectfully requested, as no new issue of patentability is raised thereby, and claim 6 is placed in better form.

Favorable consideration is respectfully requested.

Respectfully submitted,

Date: September 21, 1998
